SSAS is a specialized supervision program that works with high risk substance use clients. This intensive case management approach, addresses individual client needs as it relates to their high risk behaviors and substance use issues. The supervision process includes: drug testing, programs and services, immediate sanctions, and incentives that are all utilized to assist clients in changing their behavior and moving on to recovery.

In order to maintain consistency, the SSAS population is now queried on classification to match population totals across all info-graphics and reports.
